### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Louis Woo on 9/7/06.

The application has been amended as follows:

#### **IN THE CLAIMS:**

Replaced Claims 1 and 7 with the following:

(claim 1) A laryngeal mask airway consisting of a tubular portion and a mask portion at a patient end of the tubular portion having a an inflatable sealing cuff of generally oval shape with no partition therein defining an opening within a center thereof and adapted to seal with patient tissue around the laryngeal inlet, the mask portion defining a chamber extending from the opening to the patient end of the tubular portion where the tubular portion opens directly into the chamber such that the entire chamber is available for receiving patient tissue, characterized in that the patient end of the tubular portion is located above and to the rear of the rear side of the opening such as to space it away from the epiglottis.

(claim 7) A laryngeal mask airway consisting of a tubular portion and a mask portion at a patient end having a an inflatable sealing cuff of generally oval shape with no partition therein defining an opening within a center thereof and adapted to seal with

Art Unit: 3731

patient tissue around the laryngeal inlet, the mask portion defining a chamber where to the patient end of the tubular portion opens directly into, characterized in that the height of the recess chamber available for receiving patient tissue is between 2.5 and 3.5 the internal diameter of the tubular portion, and characterized in that the patient end of the tubular portion is located above and to the rear of the rear side of the opening such as to space it away from the epiglottis.

2. The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 7 both use the transitional phrase "consisting of", which excludes any element, step, or ingredient not specified in the claim. *In re Gray*, 53 F.2d 520, 11 USPQ 255 (CCPA 1931); *Ex parte Davis*, 80 USPQ 448, 450 (Bd. App. 1948). Therefore, the claims read over the prior art of record for the following reasons: (1) US 5,979,445 to Neame teaches a mask having a central web between the opening of the cuff and the patient end of the tubular portion. The existence of this central web or similar structure is fairly common in the laryngeal mask art. This structure is not specified in the claims. (2) US 5,983,897 to Pagan does teach a laryngeal mask without any intervening structure between the opening of the cuff and the patient end of the tubular portion. However, Pagan does not teach a single inflatable sealing cuff with no partition therein. (3) US 4,509,514 to Brain and US 6,021,779 to Pagan both fail to teach the patient end of the tubular portion located above and to the rear of the rear side of the opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
